PROFESSIONAL SUMMARY

Software engineer and Cyber Security MSc student at the University of Twente and EIT Digital, with experience building production web, mobile and cloud applications. Experienced with TypeScript, React/Next.js, AWS, Supabase/PostgreSQL and SwiftUI, alongside cybersecurity work in threat intelligence, access-control testing and LLM-assisted analysis. Previously led full-stack development at Denda Games and worked on Stamina, a personalized endurance-training platform.

ACADEMIC BACKGROUND

UNIVERSITY OF TWENTE 2025-2027
MSC CYBER SECURITY 8.0/10 GPA
EIT DIGITAL MASTER SCHOOL
UNIVERSITY OF TWENTE 2021-2025
BSC TECHNICAL COMPUTER SCIENCE 7.4/10 GPA
THESIS: AUTOMATING USER AND INFRASTRUCTURE
PROFILING FROM CYBER LEAKS WITH LLMS

CERTIFICATION & LANGUAGES

- GitHub Foundations – GitHub, 2024–2027
- Greek – Native
- English – Full professional proficiency

CAREER HISTORY

SOFTWARE ENGINEER July 2025 to
STAMINA: TECHNOLOGIES LIMITED July 2026

Contributed to the development of Stamina, a personalized endurance-training platform. Developed and shipped production features as part of a small product team, working across the application stack to improve the athlete experience.

LEAD FULL STACK DEVELOPER January 2025
DENDA GAMES BV to June 2025

Led development of a cloud-based CMC platform using React, AWS Lambda and MySQL. Designed scalable serverless services and integrations while delivering production features across the frontend and backend. Mentored interns and provided technical guidance throughout development.

SELECTED PROJECTS

SIGNALCASE 2026
Solo-built open-source macOS developer tool using SwiftUI, Next.js, Vercel and Supabase/PostgreSQL. Implemented offline- first sync, OAuth/GitHub Apps, row-level security, encrypted provider tokens and CI secret scanning.

FITREF 2025
Built a fitness-tracking web platform that integrates with Strava to transform activity data into clear, actionable performance insights. Developed with Next.js, TypeScript and Supabase, with a focus on presenting training data through a simple and intuitive user experience.
